**HOW DID ACENTRON GET STARTED:** Acentron has been staffing in the Carolinas since 1993. We are proud of the network of companies that we have established long term relations with, many of which are still our clients. **STAFFING DONE RIGHT THE FIRST TIME:** When placing candidates, we get it right the first time. Acentron has one of the highest candidate retention rates in the industry. **DOES ACENTRON HAVE SPECIALIZED STAFFING EXPERTISE:** Acentron has specialized in Information Technology staffing, from entry level to CIO positions. Because of our success, we now have an Accounting/Finance division that staffs for all skill set levels pertaining to accounting and finance occupations. **TO WHAT DO YOU ATTRIBUTE THE SUCCESS OF ACENTRON OVER THE YEARS:** Partner with your clients. We believe that if you truly partner with your clients, you build trust so that you can eliminate some of their stress hiring employees or contractors for their businesses. Our clients have enough on their plates, and if we can alleviate some of their work, we take it on. We like to become a resource that they can rely on at all times. We get to know and understand their business before

we help them in their hiring process. Give us the work...we'll earn your trust, has truly been our top mission. **MISSION:** Our mission is to provide the "best fit" candidates to our clients, from a technical or business perspective, to the cultural "fit" within the organization. We will only send resumes to our clients we feel will fit into what the organization has to offer, so that their relationship is a productive and long term one. **PROFESSIONAL MEMBERSHIPS:** Jill Rose serves as the President of the Upstate Women in Technology (UWIT) group. She networks with women throughout the Upstate area to provide an organization of opportunity, learning and friendship.
